

CS 2000

Introduction to C Programming

Policy on Academic Integrity

Working with others is a good way to learn many complex skills such as programming. In a course like this, however, assignments serve both as learning exercises and as a mechanism to evaluate your performance in the course. It would be unfair to others in the class to base one student's grade on work actually done by someone else. To deal with this dichotomy of purpose regarding assignments, programming assignments will be divided into two categories: *not for credit*, and *for credit*.

You are free to work with others in any way you choose on not *for credit* assignments. These assignments will be graded and returned to you, but the assignment grade will not affect your course grade in any way.

Work on *for credit* assignments must be your own. On such assignments, you will be given a failing grade for the course if you either turn in material clearly based on work that is not your own or you knowingly supply code or other information to another student that appears as part of his/her submitted material. Note that the failing grade is for the full course, not just the particular assignment involved. Note also that you will fail the course if you knowingly supply code or other information to another student, even if you turn in original work for yourself.

When taking a quiz or exam, you must work completely independently of everyone else. Any collaboration here, of course, is cheating. Turning in work that is not your own is cheating, as is helping someone else to turn in work not their own. This is a serious violation of academic standards. Students violating this standard will be failed from the class on the first offense.

Please read The University of Utah Code of Student Rights and Responsibilities (Sections I-B-2 and V-B in particular) for a detailed description on the University policy on cheating.

Anyone submitting assignments *for credit* in this class must provide a signed copy of this form indicating that they have read and understood this policy. For your reference, a copy of this form is available on the class web page.
